So go ahead - express yourself - your voice, your style, your talent.Your moment is Now! Stay In Touch Official Website: www.tango.meYouTube: www.youtube.com/user/tangomeTwitter: Feedback?Contact us support@tango.me We're not talking about the Argentinian tango, nor Tango, Charlie, Alpha, Bravo, or even Tango and Cash. We're here to tell you about Tango - Live Video Broadcast, the application for Android and iPhone (and that had a Windows PC version back then) that offers us the chance to make free phone calls to other users by means of the VoIP protocol. A great alternative to Skype It's hard not to compare this software with possibly the best application to make free or cheap phone calls from our phone. The truth is that Tango isn't as good as Microsoft's app as the latter incorporates a wallet function with which we can purchase credit to call landlines and mobile phones from all over the world. But if we're not thinking about calling landlines and mobiles, this app could be exactly what we're looking for. Basically, because it's a chat and messaging application of the likes of WhatsApp, Facebook Messenger or Telegram with much more advanced functions to make voice and video calls. In fact, that's one of the features that it has taken advantage of ever since the beginning, turning it into the favorite application of millions of users when it comes to seeing the face of the people we're talking to, even if we're miles apart. Voice and video calls in HD quality and for free. Main features Free calls with high image and sound quality. Call any other phone that has the app installed. Share photos, news, status updates... Send text messages and chat with your contacts. Customize messages by adding videos, stickers, and emojis. Discover new users to chat with by exploring public profiles. Add interesting people to Favorites. Games to play online against your contacts: there are over 15 with titles such as Three in a Row or Checkers. And as we said a few lines above, there was a desktop version for Windows some years ago. The latter no longer exists but there are other ways to do so as you can always download the Android APK and use an emulator of the likes of BlueStacks, Nox App Player or Andy to run it from your desktop. In any case, bearing in mind all these modern devices that we've now got access to and the quality of 4G, 5G, and WiFi connections, it might not be worth leaving our smartphone or tablet aside to use our PC. What's new in the latest version Improved video quality. Critical bug fixes. How to Download Tango - Live Video Broadcast on PC MEmu Play is the best Android emulator and 100 million people already enjoy its superb Android gaming experience. The MEmu virtualization technology empowers you to play thousands of Android games smoothly on your PC, even the most graphic-intensive ones. Ready to Play? Softonic reviewTango is a video and voice chat application the lets you connect with others via their mobile phonesFree calls for Tango usersSimilar to WhatsApp and Skype, Tango is used on your PC to connect with Android and iPhone users. If your friends have Tango on their smartphones with data plans or Wi-Fi, you can call their phone for free without leaving your computer.As simple as the mobile versionTango's PC version interface is identical to the mobile version, with a default skin made to look like an iPhone. If that isn't to your preference, you can change this skin in the options.Using Tango is simple. Add your phone number and the numbers of the friends you want to call. From there, you're just one simple click away from chatting.Great audio and videoVideo and sound quality in Tango is impressive, although it might vary by device and connection. Tango's controls are also very simple. The options let you specify how you sort your contacts, let you set up the webcam, change Tango's skin and look for updates. Unfortunately, you can't do much more beyond that by way of customization.Perfect for Tango usersWith the ability to video and audio chat with friends' smartphones from the comfort of your PC, Tango is a welcome addition to communication apps.Makes video calls to mobile phonesGood audio and video qualitySimple and efficientVery basic optionsVideo quality variesTango for AndroidTango for iPhoneRead more Something went wrong. Wait a moment and try again. Video offers free stock videos and motion graphics for use in any project. You may use these video clips free of charge, in both personal and commercial productions. Video clips that carry the Creative Commons 3.0 license must be attributed to the original author. If you have any suggestions for the site, or would like to make a request for free stock footage please contact us at: hello@videvo.net and we'll do our best to help.
